PROFESSIONAL SUMMARY

An Applied Software Engineering Technology student at Institut Teknologi Del with hands-on experience in full-stack web development, modern database management, and system analysis. Proficient in building scalable applications using Laravel, Go, PHP, and JavaScript, with a strong understanding of MVC architecture and RESTful API design. Experienced in transforming complex business requirements into functional software solutions, conducting software testing, and collaborating in agile environments. Passionate about exploring modern development practices and eager to apply technical skills in backend engineering and digital business processes.

EDUCATION

Institut Teknologi Del

Toba, North Sumatera

Diploma 4, Bachelor of Applied Software Engineering Technology

Aug 2023 - Present

- **GPA:** 3.47 / 4.00
- **Relevant Coursework:** Web Development I & II, Object-Oriented Programming, Database Systems, Distributed Application Development, Software Requirement Analysis, Software Testing, Algorithms and Data Structures, Software Quality Assurance.

SKILLS & LANGUAGES

Web & Backend:	Laravel, Go, REST API Development, MVC Architecture, Authentication & Authorization
Programming Languages:	PHP, Python, Java, JavaScript, Go, C
Tools & Platforms:	Git, GitHub, Postman, Figma, Tableau, Microsoft Excel, Railway, Apache Spark
Database Management:	MySQL, PostgreSQL, MongoDB, SQL Server, Firebase
Methodologies:	Agile/Scrum, Waterfall, SDLC, Business Process Modeling (Draw.io, StarUML, Bizagi)
Soft Skills:	Analytical Thinking, Problem Solving, Communication, Team Collaboration, Leadership
Languages:	Indonesian (Native), English (Intermediate)

PROJECT EXPERIENCE

Web-Based Agent for GJM and GKM Administrative Automation

Toba, North Sumatera

Backend & Database Developer

2026

- Developed a web-based administrative automation system for GJM and GKM to streamline academic quality assurance processes and reduce manual workloads.
- Designed and implemented secure backend services, database structures, and workflow automation features using Laravel, MongoDB, and REST APIs.
- Built high-throughput data processing modules to manage large volumes of academic evaluation and questionnaire data for centralized information management.
- Integrated reporting and monitoring functionalities using Apache Spark, improving data accessibility and operational efficiency for the Faculty of Vocational Studies.
- Utilized Git for version control and collaborated within a structured software development lifecycle (SDLC).

Mobile Application – Hommie: Boarding House and Homestay Booking System

Toba, North Sumatera

Full-Stack Developer

2025

- Developed a mobile-friendly web accommodation booking system to help users search, view, and reserve homestays in the Lake Toba area.
- Designed and built core backend functionalities using Laravel and PHP, including JWT-based user authentication, accommodation management, and booking transactions.
- Formulated and optimized relational database structures in MySQL to ensure efficient storage and real-time retrieval of reservation data.
- Deployed the system to a cloud-based hosting platform (Railway), ensuring high availability and seamless API integration for front-end clients.

Mutiara Kindergarten Information System

Toba, North Sumatera

Project Manager

2024

- Coordinated project planning, task allocation, and team collaboration for the development of a web-based information system.
- Gathered and analyzed user requirements, translating business needs into functional and technical specifications.
- Collaborated with developers during database design, testing, deployment, and feature validation activities.
- Ensured project delivery through effective stakeholder communication and structured software development practices.

E-Wallet Usage Analysis Dashboard in Toba Regency

Toba, North Sumatera

Data Analyst

2025

- Built an interactive dashboard to analyze key socio-economic factors affecting e-wallet adoption and transaction intensity.
- Collected, cleaned, and processed regional survey data using Microsoft Excel and Exploratory Data Analysis (EDA) techniques.
- Created data visualizations in Tableau to communicate insights on consumer behavior and digital payment trends to stakeholders.

PROFESSIONAL EXPERIENCE

Overseas Social Innovation Project (OSIP) | IT Del x SIT

Parapat, North Sumatera

International Collaborative Project Member

Dec 2025

- Collaborated in cross-cultural teams with Singapore Institute of Technology (SIT) students to analyze real-world operational challenges faced by local MSMEs/UMKM.
- Conducted field observations and stakeholder interviews to design sustainable digital solution proposals for local businesses.
- Enhanced interpersonal communication, critical thinking, and cross-border teamwork.

Coding Camp 2026 Progressive: Gen AI Engineer | Dicoding x DBS Foundation

Remote

Bootcamp Participant

Apr 2026

- Completed an intensive training program focused on Artificial Intelligence, Generative AI fundamentals, and Machine Learning engineering.
- Developed hands-on programming skills in Python, prompt engineering, and intelligent system workflows through project-based assessments.

Microsoft Elevate Training 2025 | Dicoding Microsoft

Data Science & AI Trainee

Remote

Aug 2025

- Learned foundational concepts in Data Science pipelines, data engineering, and cloud-based analytics workflows.
- Gained hands-on experience utilizing Microsoft Fabric and Microsoft Azure for data processing and intelligent system integration.

ORGANIZATIONAL EXPERIENCE

Department of Science and Technology (DIPTEK)

Head of Multimedia Division

Toba, North Sumatera

Feb 2026 - Present

- Lead the multimedia division in designing, creating, and managing visual and digital content to support organizational branding and publications.
- Coordinate cross-functional team workflows to ensure timely asset delivery for science and technology initiatives.

HIMATERA (Student Association)

Active Member

Toba, North Sumatera

Sep 2023 - Present

- Actively contribute to department-level student collaboration programs, academic development initiatives, and community events.
- Developed strong teamwork, event coordination, and communication skills through active committee roles.

VOLUNTEERING

Disaster Relief Volunteer – Sibolga Landslide

Humanitarian Volunteer

Sibolga, North Sumatera

Dec 2025

- Assisted emergency relief operations for landslide victims by coordinating logistics and humanitarian aid distribution.
- Partnered with local response teams to accelerate community recovery efforts.
